MISSING:
8488 Tires
from the
Maricopa Heritage District

Where did all the tires go?

All of the tires are recycled at CRM in Queen Creek, AZ. CRM processes the tires into crumb rubber and re-sells the crumb rubber from the recycled tires to our **Arizona Department of Transportation**. ADOT utilizes the crumb rubber from our recycled tires into their rubberized asphalt mix when constructing new roadways.

Many thanks to everyone that made this project possible:

The City of Maricopa for formalizing the Heritage District Advisory Committee and assigning staff to facilitate this project, The Heritage District Advisory Committee for approving this project, the Gila River Indian Community for the grant funds that helped pay for this project, Pinal County Public Works and CRM for accepting the tires from this project, the many "volunteers" and property owners that "stepped-up" to help in the clean-up effort.
